

PTA.org/STEM

Did you know that there could be as many as 2.4 million unfilled science, technology, engineering and math (STEM) jobs by 2019? Do you want to help students and families discover a love of science?

We are looking for volunteers to help us during Lowell Elementary School's STEM + Families Science Festival, sponsored by Bayer from 4 pm to 7 pm on February 28th, 2019 at Lowell Elementary School.

**STEM + Families Science Festivals are fun, family-friendly events that spark passion for STEM through activities and experiments for BOTH students and their families!**

And if you're concerned about the experiment part—don't worry! You do NOT need any science experience to help staff this event. Even if you lead a station, we will have easy-to-follow facilitator guides that explain exactly what to do in a step by step breakdown. In addition to working at these stations, we also need volunteers to help with registration, food and prizes.

Research shows that **family engagement** leads to greater student success. Students who understand and enjoy science earn higher grades, attend school regularly, have better social skills and go on to college. We want to help the students of Lowell to be ready for the future and hope that you can help by volunteering your time to make this event a success!

If you are interested in contributing to our event, please contact Stacey or Sarah at the numbers or e-mails below by February 8th, 2019.

Thank you,
