Data centers are at the center of modern software technology, serving a critical role in the expanding capabilities for enterprises and Communication Network infrastructure. A new model of data center is emerging, one where it's not just about collocating IT with bandwidth, but about bringing Network, IT, people and technology together in a truly collaborative environment. Join this FREE event and listen to experts from industry and academia, how the data center has evolved and how it is going to expand in context of Edge computing and 5G.

Schedule

Time	Talk Title	Speaker
2:30-3:00pm	Welcome and Keynote address	Jayanta Dey, CTO-Tech-BU & Head- Network Equipment Provider vertical
3:00-3.40pm	Data Center Networks Architecture, Evolution and Design Challenges	Prof Suresh Subramaniam George Washington University, USA
3:40-4:15pm	High Tea	
4:15-5:00pm	Edge Computing	Chetan Kumar Shivakumar CEO and co-founder, Aikaan Labs Pvt Ltd
5:00-5:45pm	Mobile Edge Computing for 5G	Salil Agarwal, DMTS, Nokia Solutions and Networks
5:45-6:00pm	IEEE and Its Initiatives	Dr Navin Kumar and Munir Mohammed
