

IEEE Systems Council Chapter presents IEEE Distinguished Lecture Series:

Dr. Jim Burns

In Person
Date: 5/4/2023 (Th)
Time: 6:00 – 7:00pm
Location: ET 113

EV Battery and electrical safety training- a flash introduction.

Abstract: A three-hour EV electrical and battery safety training presentation will be condensed into one hour to provide the audience with a bare minimum of knowledge helpful in working safely and productively with high-voltage batteries and charging equipment used in electric vehicles.

About speaker: Dr. Jim Burns has enjoyed a long and impactful career in the EV industry, first as a tenured professor of Engineering performing systems research and teaching students about the coming EV revolution, and then as company founder at Transpower, a pioneering leader in development of heavy-duty electric semi-trucks, and most recently in the development of high-power charging equipment.
