

IEEE Systems Council Chapter presents IEEE Distinguished Lecture Series:

**Dr. Nick Panagiotacopulos**

**Virtual**  
**Date: Friday, April 07, 2023**  
**Time: 12 noon**  
<https://csulb.zoom.us/j/86418409410>  
Meeting ID: 864 1840 9410

*Cooperative research program between universities worldwide dealing with diet and its effects.*

**Abstract:** The FKW project, although it was conceived many years ago, was shaped up after my retirement from CSULB in June 2004, and it is still in evolutionary state. Its purpose is to improve the lives of humans and animals from any form of suffering by providing awakening educational information and research programs about human behaviors towards other humans on the issues of violence and cruelty caused by wars, dictatorships, human trafficking, and other forms of abuse, including, lack of responsibility towards our environment, and about the cruel behavior of humans towards animals who are the exploitable, and powerless victims for satisfying human's gastronomical passions, financial benefits and unrealistic research objectives.

**About speaker:** I am a Caltech Graduate from the Department of Aeronautics, an ex-Jet Propulsion Laboratory (JPL) engineer, an ex- Caltech research associate and a Professor Emeritus from the Department of Electrical Engineering of the California State University at Long Beach (CSULB) Ca. Currently, I am the CEO of the For a Kinder World (FKW) organization.
