Southern California Edison: Smart Grid Strategy

Abstract: *In this talk, Edison International Vision is presented, i.e., an increasingly clean and diverse supply of generation is flowing over a smarter and more reliable electricity grid to serve customers who are using electricity more wisely, and in more ways, than ever before.*

About speaker: Mr. Michael R. Montoya is the director of Grid Advancement for Southern California Edison's Transmission and Distribution within SCE's Transmission and Distribution Business Unit. The Advanced Technology group, previously Engineering Advancement, was created in November 2004. Mr. Montoya earned his undergraduate degree in business administration from the University of La Verne, and also obtained certificates in IT Essentials for Business Leadership from Pepperdine University, and in Sustaining the Innovative Organization from the Sloan School of Management at Massachusetts Institute of Technology.
