

IEEE Columbia presents

# Cyber Security: The Extent of the Problem and the Solution Space

An IEEE technical session for practitioners, researchers, policymakers, and university student groups

## Technical Session At-A-Glance

This technical session offers an advanced view of cyber space from multiple stakeholder perspectives. It covers the extent and range of the problem, from state-sponsored attacks, organized crime, and hackers. It then looks at what is needed to address and combat the possible problems with a range of solutions including education and training, and examples of a range of tools and consultancy to markedly improve our defenses.

Attendees will have an opportunity to participate in the Q&A lighting round.

What You Will Learn:

- Why redefining cyberspace is necessary
- An understanding of the cyber ecosystem methodology
- An introduction to techniques, tools, and talents

■ 5:00PM Networking & Reception

■ 5:30PM Greetings & Presentation of the Panel

- Center of Excellence for Cyber Security at the USC
- South Carolina National Guard
- Space and Naval Warfare Systems Command (SPAWAR)
- South Carolina Blue Cross Blue Shield
- Federal Bureau of Investigation

■ 8:00PM Networking

■ 8:30PM Closing

Next session: October 2, 2014 "Wi-Fi – How It Works and Where Its Being Applied" (Details on website.)

### Date:

**Thursday  
September 18, 2014**

### Time:

**5:30PM to 8:30PM**

### Location:

**IT-OLGY  
1301 Gervais Street  
Columbia, SC 29201**

### Register Online:
