IEEE ComSoc TCCN
Published by Zhijin Qin (??) · 33 mins ·

Congrats to the new TCCN chair @Yue Gao and TCCN officers. Thanks for the great contributions of the current TCCN chair @Jianwei Huang and the other officers!

Here is the new TCCN officers:

- Chair: Yue Gao (Queen Mary University of London, United Kingdom)
- Vice-Chair (Europe/Africa): Oliver Holland (King's College London, United Kingdom)
- Vice-Chair (Asia Pacific): Lingyang Song (Peking University, China)
- Vice-Chair (Americas): Daniel Benevides da Costa (Federal University of Cear , Brazil)
- Secretary: Lin Gao (Harbin Institute of Technology, Shenzhen, China)

The screenshot displays the IEEE ComSoc Communities website interface. At the top, there is a dark blue header with the IEEE ComSoc logo on the left, the text "COMSOC COMMUNITIES" in the center, and the IEEE logo on the right. Below the header is a navigation bar with links for "Home", "Groups", "FAQ", "My Account", and "Log Out". The main content area is divided into two columns. The left column, titled "My Groups", lists "TC Cognitive Networks". The right column, titled "TC Cognitive Networks", contains a description of the group's goals and activities. The description states: "The goal of Technical Committee on Cognitive Networks (TCCN) is to provide a platform for its members in particular, and the cognitive networking research, development, policy making and standardization community in general, to interact and exchange technical ideas to identify major challenges and also drive solutions in the development of cognitive networking technologies. The technical issues addressed by the committee will include spectrum agile/dynamic spectrum access networks, related issues from PHY to application layers, security issues, policy issues (e.g., spectrum policy reform by U.S., Canada and European Union), implementation technologies (e.g., software radio, middleware), economic considerations and standardization activities. Cognitive networks are touted to drive the next generations of digital communications. This technical area is attracting a tremendous amount of interest from academia, university, industry and government. New IEEE standardization activities, FCC's spectrum policy reform, federally funded research programs (e.g., DARPA XG and NSF NeTS ProWiN) are some examples of major activities supporting R&D in cognitive networks."
