# IEEE Transactions on Cognitive Communications and Networking

## ▶ Launched in 2015

- Cosponsored by IEEE Communications and Signal Processing Societies

## ▶ EiCs

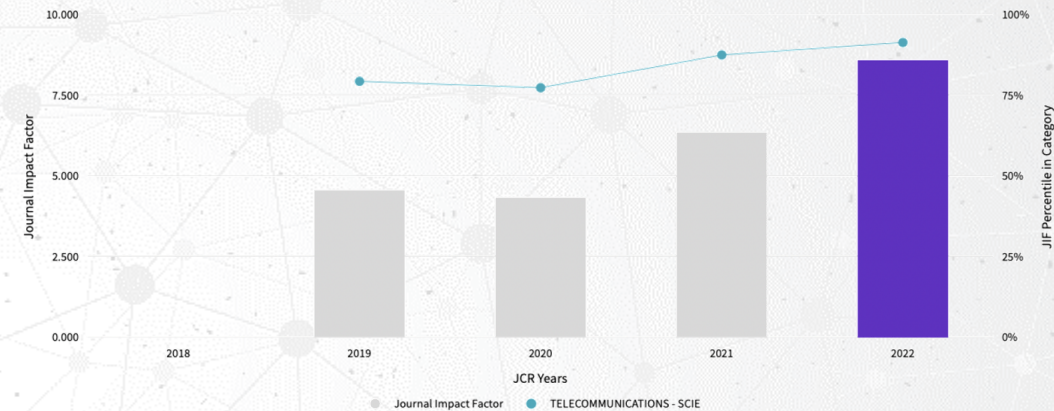

- Michele Zorzi, University of Padova, Italy, 2015-2018
- Ying-Chang Liang, University of Electronic Science and Technology of China, China, 2019-2022
- Shiwen Mao, Auburn University, USA, 2023-2024

## ▶ First impact factor in 2019: 4.574 → 8.6

## ▶ Ranked 8/88 in Telecommunications

## ▶ New Impact Factor will be received in June

# Scope and Areas

**Scope:** The IEEE Transactions on Cognitive Communications and Networking (TCCN) is committed to timely publishing of high-quality manuscripts that advance the state-of-the-art of *cognitive communications and networking* research. The focus of the Transactions will be on “**cognitive**” behaviors in all aspects of **communications** and **network** control, from the PHY functions (including hardware) through the applications (including architecture), and in all kinds of communication networks and systems regardless of type of traffic, transmission media, operating environment, or capabilities of communicating devices.

# More Updates

- ▶ The submission portal now is IEEE Author Portal, but the editorial processing is still done in ScholarOne as before
  - IEEE Author Portal demo: [https://drive.google.com/file/d/183s6lupNLyjlFlqjp996-SUyg\\_z7ZbL2/view](https://drive.google.com/file/d/183s6lupNLyjlFlqjp996-SUyg_z7ZbL2/view)
- ▶ Starting 2023, the number of issues has been increased from four to six per year
  - Backlog greatly reduced
  - Reduced the publication delay, benefit authors and papers on timely topics
    - Aug. 2023 papers to appear in the Dec. 2023 issue
  - Page budget increased from 1,400 to 1,700: by the Oct. 2023 issue, already used 1414 pages
    - Papers get longer: more overlength fees for IEEE
- ▶ About 55% increase in submissions; average load on each AE is still maintained not high
  - Load balancing when assigning papers, as well as matching the expertise
  - More AEs: 41 to 52
- ▶ ComSoc enforces stricter term limit for editorial board members of its publications
- ▶ PSPB motion: starting 1 April, new manuscript submissions will no longer be allowed to include the Lena image

# More Updates (cont'd)

- ▶ **Collaboration with ComSoc Technical Committee on Cognitive Networks (TCCN)**
  - *THE* ComSoc technical committee (TC) focusing on cognitive and artificial intelligence (AI) empowered networking research, development, policy making and standardization
- ▶ **Collaboration with IEEE Communications Magazine**
  - Transfer papers that are not good fit of scope
- ▶ **Conference collaborations:**
  - DySpan 2024: fast-track review of few of their top, expended papers
- ▶ **Integration with IEEE DataPort**
  - No cost to TCCN or sponsoring societies for the integration
  - Authors have the option to upload their data along with their manuscript when making a submittal
- ▶ **Integration with CodeOcean**
  - A platform where users can share and run algorithms in the cloud
  - Authors are provided with instructions on contributing their codes in the acceptance email
  - This will avoid potential biases, provide fairness, and finally promote trust in the review process.
- ▶ **Reviewer invitation email:**
  - *“If you do not have a conflict of interest with the authors, such as family relation, research collaboration within the past 5 years, or same affiliation, please click here to accept the review:”*

# Policy on AI Generated Content

## ▶ Guidance for IEEE Publications Regarding AI-Generated Text

- At its February 2023 meeting the IEEE Publication Services and Products Board passed the following motion, to be used as initial guidance by IEEE Publications:
- *“The use of artificial intelligence (AI)–generated text in an article shall be disclosed in the acknowledgements section of any paper submitted to an IEEE Conference or Periodical. The sections of the paper that use AI-generated text shall have a citation to the AI system used to generate the text”*
- Effective immediately, Editors-in-Chief should take steps to ensure that relevant author-facing communications such as author instructions on the sponsoring Society/council website

## ▶ Need to be careful of AI generated reviews as well

## ▶ IEEE’s standing on this issue, but not clear how to enforce the policy

- Some similarity check tool can check an AI score
