IEEE Nordic SYP Congress, 25-27 October 2019

The IEEE Nordic Student and Young Professional (SYP) Congress is a bi-annual event promoting cooperation and sharing of ideas between the Nordic student branches, young professionals and women in engineering affinity groups and chapters. This will be 3rd edition of the event. The previous two congresses have been organized in Stockholm, Sweden (2015) and Vilnius, Lithuania (2017).

This event gives an unique opportunity to grow global networks and to get new ideas! We expect to see at least 50 Young Professionals and Students during the weekend from all around Region 8. The program includes interesting IEEE presentations, workshops and team building activities.

The theme of the Congress for 2019 is sustainability. How can young professionals and students improve sustainability in the future? The participants will have a great opportunity to listen to interesting presentations and panel-discussions from professionals working both in industry and academia. The topics to be discussed during this event include e.g. smart cities, electric vehicles, energy storages and improved energy efficiency. In addition, we will have an opportunity for industry visits!

Sweden and Finland Sections are co-hosting the event, this year. Therefore, participants have a unique opportunity to see both biggest Nordic cities during one weekend on a cruise ship between those cities! Participants can try the Finnish sauna and swimming pool or sit on the deck and take Swedish snaps while watching the beautiful Finnish coast with thousands of small islands!

Organizers are looking for interesting speakers and company visits, right now. If you want to give your own presentation during the meeting, feel free to contact the organizers! More information, contact details of the organizers and the registration form can be found in our website nordicsyp.ieee8.org. Looking forward to meeting you in October!
