

IEC/IEEE 62582 Methods for condition monitoring

Status report June 2011

Part 1 General
Part 2 Indenter
Part 4 OIT/OITP

FDIS circulated in IEC on June 3. Voting terminates on
August 5

The documents have been cleared and agreed upon in
IEEE

If the voting in IED are positive with only editorial
comments, the documents will be ready for publishing
early in autumn 2011

Part 3 Elongation-at-break

CD2 has been accepted without comments in IEEE. Will be circulated within IEC and IEEE as CDV in June. Voting result expected in November 2011. If the comments are of mainly editorial nature, they will be resolved by correspondence by the project team. If not, the comments will be discussed in the next meeting in February 2012

Part 5 Optical time domain reflectometry

Second working draft is sent to the members of the project team in September 2011. Will be discussed by correspondence.

If not solved before, a final working group discussion will take place in conjunction with the IEC meeting in Karlsruhe in end of February 2012 with CD as target.
