Gallium Nitride Device Technology for RF Applications
Bruce M. Green
Senior Member of the Technical Staff, Freescale Semiconductor

ABSTRACT:
High voltage and current handling capability coupled with excellent frequency response characteristics have propelled gallium nitride (GaN) device technology to the forefront for high-power, high efficiency, and high frequency RF power applications. This presentation will cover GaN device technology starting with the basics of GaN materials and device structures and then cover RF power amplifier applications for wireless communications. Finally, the talk will address GaN device technology limitations and then address trends in the industry for further improvements.

BIOGRAPHY:
Bruce M. Green received the B.S. and M.S. degrees in Electrical Engineering from Brigham Young University (BYU) in 1996 and 1997. In 2001 he earned the Ph.D. degree from Cornell University where his research focused on the characteristics, optimization, and integrated circuit applications of gallium nitride (GaN) transistors. After graduation from Cornell, he joined Motorola, now Freescale Semiconductor, where he is a Senior Member of the Technical Staff involved in GaN transistor research and development. In 1996-1999 he was the recipient of a National Science Foundation Graduate Fellowship. In 1998 he was awarded a Microwave Theory and Techniques Graduate Fellowship and in 1999 he was awarded a Schlumberger Foundation Fellowship. In 2006, he received an IEEE Phoenix Chapter award for contributions to the development of Gallium Nitride RF devices. He has published over twenty five papers in refereed journals and conference proceedings, and has six issued U.S. patents. Dr. Green is a member of IEEE Microwave Theory and Techniques Society and the Electron Devices Society and serves as a reviewer for journals published by these societies. Dr. Green is also a member of Tau Beta Pi and Eta Kappa Nu.

Women in Engineering Affinity Group

Five representatives of the IEEE Phoenix Section Women in Engineering (WIE) Affinity Group (AG) assisted with the Arizona Science Lab on June 20th by teaching a group of 38 eighth grade students the "Here Comes the Sun" program. This program consists of a lecture put on by other volunteers about electricity and solar power. The WIE volunteers assisted the students with constructing their solar power race cars using materials from a pre-assembled kit. The students were responsible for assembling the components so that their car ran forward and in a straight line. This is not as easy as it sounds as the volunteers were able to build their cars immediately prior to helping the students.

The students raced their cars. The one able to go the fastest and straightest for several race heats was declared the winner.

Thank you to all the WIE volunteers who participated.

If you would like to be added to our distribution list for further information about this and future events, please contact Diane Watkins (diane.watkins@srpnet.com).

If you would be interested in helping to organize any of our activities or have suggestions for other activities or speakers for future events, please feel free to contact any of our organizing committee members:

IEEE-USA Government Fellowships:
Each year, IEEE-USA sponsors three qualified IEEE members to serve as government fellows: one Engineering & Diplomacy Fellow and two Congressional fellows. The fellows spend a year in Washington, serving as advisers to the U.S. Congress or key U.S. Department of State decision-makers. IEEE-USA’s Government Fellowships link engineers with government, providing a mechanism for IEEE-USA members to learn firsthand about the public policy process through personal involvement.
The congressional fellowship consists of an appointment to the personal staff of a U.S. Senator or Congressman, or to the professional staff of a Congressional Committee. The Fellow along with the Congressional sponsor and IEEE-USA, negotiates a starting date, although IEEE-USA recommends that Fellowship terms run from January 1st to December 31st. For an application Kit for the 2013 Congressional Fellowship Program, visit: http://ieeeusa.org/policy/govfel/documents/cfappkit13_000.doc
The State Department fellowship begins in January of each year and offers an opportunity for an engineer to provide technical expertise to the State Department, and help raise awareness of the value of engineering input while learning about and contributing to the foreign policy process. For an application Kit for the 2013 Engineering & Diplomacy (State Department) Fellowship Program, visit: http://ieeeusa.org/policy/govfel/documents/Stateappkit13.doc
The postmark application deadline for 2013 Fellowships is 16 March 2012. For more information, visit: http://www.ieeeusa.org/policy/govfel/default.asp
WASHINGTON INTERNSHIPS FOR STUDENTS OF ENG’G
(WISE)

SUMMER 2012 PROGRAM Monday, 4 June - Friday, 3 August:
