IEEE pimrc

IEEE International Symposium on Personal, Indoor and Mobile Radio Communications

9-12 September 2018 – Bologna, Italy

Call for Papers

Bologna is a historical city, with around 380 000 inhabitants, and represents a compulsory point of passage between the North and South of Italy, from which the most attractive historical Italian cities such as Venice, Florence and Rome can be conveniently reached by train or car. The University of Bologna, founded in 1088, is considered the most ancient University in the western world. Its history, both in science and the humanities, makes it an indispensable point of reference in the panorama of European culture. For nearly a thousand years, the city of Bologna has witnessed and participated in the production of knowledge and the development of technological innovations. Bologna is also the city of Guglielmo Marconi, where he did the first wireless communication experiment in 1895. Inspired by this, PIMRC welcomes original research and developments in all areas of wireless technology.
