

Call for Recent Results Papers

PIMRC, through its calls for papers, special sessions and workshops, has already attracted more than 700 Authors from all over the world. The program will include nine workshops and seven tutorials on Sunday, Sept. 9, plus four panels, five keynote speeches, fourteen special sessions and hundreds of papers presented in regular sessions on Sept. 10-12.

The Organising Committee of PIMRC now welcomes short papers including results from recent original research and developments in all areas of radio technology. Papers should be submitted by the deadline, and be **no longer than two pages, including numerical results and references**. Accepted works will be presented in the form of posters, either on Monday, Sept. 10, or Tuesday, Sept. 11, during a dedicated time slot before the oral sessions will start. Accepted papers will be uploaded to IEEE Xplore as they are at time of submission. Authors submitting a paper to this call (both in case of acceptance or not) will be allowed to register to the conference using the Early Bird Rates till August 6.
