#### Scope:

The JFRB are devoted to recent research in all fields of sciences based on applications of Bayesian Networks framework. It is a multidisciplinary meeting forum for researchers who develop mathematical models and computational tools applying Bayesian Networks to the study of phenomena in the broad fields of biology, ecology, biotechnology, medicine, environmental science, bioengineering, computer sciences, economics, finances etc.

The previous workshops were held in Nantes in May 2010, Lyon in May 2008, Valenciennes in May 2006, Rouen in March 2003, and Paris in June 2001.

#### Key dates:

#### How to participate:

To participate in this event, please send your paper (3-6 pages) before **February 26, 2012** to: [bioinformatics@cbs.rnrt.tn](mailto:bioinformatics@cbs.rnrt.tn)

The official language of workshop is French, but English is accepted.

Papers may be submitted by following the instructions in IEEE format to download from: [http://www.ieee.org/conferences\\_events/conferences/publishing/templates.html](http://www.ieee.org/conferences_events/conferences/publishing/templates.html)
