

Invenergy Beech Ridge 100.5 MW Wind Farm Tour

Monday, October 8th 2018, between 12:30 and 3:30 pm

Site address: 2144 Beech Knob, Richwood, WV 26261

About Invenergy: Invenergy, LLC develops, builds, owns and operates power generation and energy storage projects in North America and Europe. Its portfolio includes wind, solar, and natural gas-fueled power generation and energy storage facilities. It is one of the six largest owners of wind generation plants in the United States and is North America's largest independent wind power generation company.

Invenergy has developed 10,071 MW of wind farms in operation; 5,519 MW of natural gas-fueled facilities in operation; 231 MW of solar projects in operation; and 94 MW of energy storage facilities in operation. At least 3,982 MW of renewable and clean energy projects are under contract or in construction. Wind production is spread over 77 operating projects, with several others currently in development and construction.

Founded in 2001 after the sale of SkyGen Energy to Calpine Corporation by energy veteran Michael Polsky who also serves as president and CEO, Invenergy is based in Chicago, Illinois. Invenergy also has North American offices in Denver, Toronto, and Mexico City. European activity is centered in Warsaw. The company also has an office in Tokyo. [Wikipedia]
