Standards Subcommittee

Kevin Lee
Chief Engineer, Eaton, USA (Kevin_Lee@ieee.org)
IEEE – IAS – IDC Standards Subcommittee Structure
Mission Statement of IDC Standards Subcommittee

The goal of the Standards Subcommittee of the IEEE Industrial Drives group is to participate in the development of Standards and/or Practices pertaining to electric drive systems. Electric drive systems include but are not limited to all types of electrical motors and drives that are used for controlling torque and speed of said electrical motors.

Participation is not limited to co-operating with other Standards groups or organizations within the IEEE and/or other technical bodies of the world but also includes taking a leading role in formulating new standards to facilitate meaningful applications of said standards in the industrial and commercial workplace.
IEEE Standards Development Lifecycle

1. Initiating the Project
2. Mobilizing the Working Group
3. Drafting the Standard
4. Balloting the Standard
5. Gaining Final Approval
6. Maintaining the Standard

Successful milestones:
- Initiating the Project
- Mobilizing the Working Group
IEEE Classifications of Standards

- **Standards**: documents with mandatory requirements.
  - *Shall* indicates mandatory requirements to be strictly followed without deviation in order to conform to the standard.

- **Recommended practices**: documents in which procedures and positions preferred by the IEEE are presented.
  - *Should* indicates a particular recommendation among several possibilities without mentioning or excluding others; or that a certain course of action is preferred but not necessarily required.

- **Guides**: documents in which alternative approaches to good practice are suggested but no clear-cut recommendations are made.
  - *May* indicates a course of actions permissible within the limits of a standard.
  - *Can* indicates possibility and capability.

- **Trial-Use documents**: publications in effect for not more than three years (See subclause 5.7. of the IEEE SA Standards Board Operations Manual). They can be any of the categories of standards publications listed above.
Project Title: P2943-Energy Efficiency Test Methods for Three-Phase Variable Frequency Drive Systems.

Scope Statement: This standard defines a common test protocol for determination of energy efficiency for motor drive systems, for an AC motor and a combination of a Variable Frequency Drive (VFD), AC motor, and ancillary equipment. Performance classifications for the said motor drive systems are also defined.

Project Status: On September 24, 2020, the IEEE SA Standards Board approved the project.

Project Timing: Until December 31, 2024.

Procedure for Selecting Conference Paper Awards

All ECCE papers submitted to Trans. on Industry Applications by end of May were considered (14 papers).

Review process

Six criteria: Readability, Use of Figures and Graphics, Education, Broad Interest, Significance, Impact.

Each criteria is scored from 0 to 5

According to the above criteria, each reviewer was requested to define his preferred ranking list of the 12 papers

A score was given to each paper according to its position in each ranking list.

The reviewer scores were summed to find the final score of each paper.
