About IEEE

VISION

IEEE is essential to the global technical community and to technical professionals everywhere, and is universally recognized for the contributions of technology and of technical professionals in improving global conditions

MISSION

IEEE's core purpose is to foster technological innovation and excellence for the benefit of humanity.

About All India Student Congress 2010

The IEEE student members are the leaders of tomorrow. As student members are associated to a particular student branch, they are able to access the world's most comprehensive source of electrical, electronic and computer engineering publications. Student members also benefit by networking with the members and the industry leaders, gaining leadership experience and developing interpersonal skills by getting involved in the local and section activities. In order to consummate the IEEE's goals, it is a necessity for the sections to share the ideas and best practices among themselves thus improving the functioning of their respective student branches. Keeping this in view IEEE Bombay Section has decided to host the All India Student Congress (AISC) for the year 2010 in association with IEEE-CRCE.

About IEEE Bombay Section

IEEE India section started in early seventies though preparations started much earlier, and Mr. F. C. Kohli was its first Chairman.

In 1976, three sections were formed of which Bombay was one, other two, were Bangalore and Delhi sections and India section was renamed to India-Council.

Bombay Section conducted largest number of technical programs among all sections of IEEE. Further, every year, they hold technical conferences running for two days or more. IEEE Bombay Section got recognition as the 2007 R10 Distinguished Large Section. It is also the winner of 2002 Outstanding Section Award.
