

PSCC Power Line Carrier – C93.5 Working Group Meeting Minutes

Leader: Craig Palmer (RFL)

Secretary: Tony Bell (Ametek)

Attendees: Craig Palmer (M), Tony Bell (M), Mark Majka (M), Jeff Brown (M), Jim O'brien (M), Ian Tualla (M), Don Lukach (M), Rafael Garcia (M), John Miller (M), Addis Kifle (G), Dom Fontana (G), Nef Torres (G) (12 people total – 2 from suppliers and 10 from utilities – 9 members and 3 guests)

C93.3 had some minor additions by Bruce Pickett for overload current but is in process of being approved as far as we know.

C93.5 Discussion

We re-did the scope/purpose as previous one was accidentally lost.

Jeff Brown motioned to approve the scope and John Miller seconded. Unanimous approval.

Rafael Garcia motioned to approve the purpose and it was seconded. Unanimous approval.

Craig will submit to IEEE for a PAR.

We reviewed whole document briefly as we made assignments.

Assignments (due by end of August)

- Put document in new template – Craig Palmer with IEEE SA
- Definitions – John Miller
- Unusual Service Conditions (section 4) – Mark Majka
- Security/Dependability (Ratings, testing, etc) – Tony Bell
- Ratings – Craig Palmer (Should IEEE 1613 be referenced or harmonized with?)
- New functionality/Migration from EM relays (Ratings) – Jeff Brown
- Testing (Section 6)– Tony Bell & Craig Palmer both to review whole section
- Manufacturing Requirements – Ian Tualla/Don Lukach
- Annex A – Tony Bell/Craig Palmer

Craig will send the draft of the standard to all attendees once he gets it into the IEEE template.

Meeting adjourned at 3:35PM.
