IEEE SIGHT

Special Interest Group on Humanitarian Technology

◆Purpose and Contents

We organize Hackathon in order to learn the skill that address problems of Japanese modern society for the students and young professionals. And the various cutting edges of technologies are focused in this event. We try to develop the mobile application as a 1st event. We have a basic lesson for the mobile application, therefore we are welcome even if you are not familiar with this technology. Winner team will get the book card (3000 yen) for each person.

* Please bring you note PC for this event.

◆Technology and Theme

Technology : Android Application (Java)

Theme : Regional Revitalization

- Connection between center of town and the provinces
- Improvement of the university life across the area
- Economic development projects in the area
- Natural disaster provision, etc.

Speaker : Prashob Nair (Software Engineer, Toshiba)
