

A large, three-dimensional sculpture of the text "#CES2022" is illuminated at night. The sculpture is composed of white and light blue letters with a hollow, cutout design. It sits on a dark, rectangular base. The background shows an outdoor plaza at night with streetlights, a building, and some trees.

# Reencle

Within 24 hours

Completion of decomposing food waste!

## 01 Perfect for Salty and spicy foods

- Typical microorganisms die under high salinity and strong acid
- Reencle microorganisms prefer high salinity and strong acid
- Basiophile, acidophile, and thermophile microorganisms

## Food Cleaner

Microorganisms used for Reencle (the Food Cleaner) were developed by the AEN BIO CO., Ltd Center of Dong-Eui University (that received the minister award (the Ministry of Trade, Industry and Energy) and the president award of KIAT. They are bacillus mixed microorganisms extracted from traditional fermented soy bean foods. Since the microorganisms can withstand high salinity, high acidity, and high temperature, they are perfect for decomposing spicy and salty foods. (AEN BIO CO., Ltd Center of Dong-Eui University)

## 02 Semi-permanently usage

- Archaea which can withstand extreme environments
- When the surroundings are not suitable for growth and development, creates endospore and survive more than 100,000 years
- Decompose all organic waste

## 03 Decompose all organic waste

- Decompose all organic waste composed of carbon monoxide, hydrogen nitrogen and oxygen
- Can decompose most food waste

## Acceptable and unacceptable materials

Acceptable food waste (The machine can decompose anything that people can digest)

**YouCount**  
Biomarker Measurement Platform

- Clinically Accurate
- At Home, Easy to Use
- Remote Monitoring
- 2-minute Test Results
- Private and Secure
- Advanced Analytics
- 15+ Biomarkers Available

**Qui Technology**  
Next generation at-home medical device utilizing machine vision and data analytics for biomarker measurement.

Cholesterol, Blood Pressure, and more health markers. Track trends, and receive alerts for abnormal health markers. No needles, no phlebotomy, thereby improving patient compliance.

**Kidney Care**  
Enables patients to complete required A/C urine tests at home in minutes.

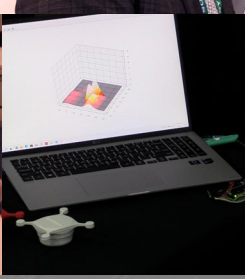

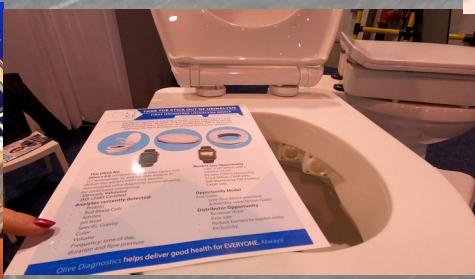

Remote Monitoring

- Eliminate testing procedures in laboratory, lab or waiting room.
- Remote test results available to your computer (EHR from your smart phone).
- Advanced technology reduces patient error.

Features:

- Monitor proteinuria
- Monitor blood pressure
- Identify albuminuria

## Biomarker Measurement Platform

- Clinically Accurate
- At-Home, Easy to Use
- Remote Monitoring
- 2-minute Test Results
- Private and Secure
- Advanced analytics
- 16+ Biomarkers Available

### Our Technology

Next generation, at-home medical device utilizing machine vision and data analytics for biomarker measurement.

Our test platform measures and tracks biomarkers, and uses data to identify long-term patterns, enabling informed health decisions over time, thereby improving patient outcomes.

#### Kidney Care

- Enables patients to complete guided ACR urine tests at home.

- Results in minutes

## Remote Monitoring

Smart urine testing platform @home -> eliminates visit to lab or waiting-room.

Healthcare providers receive clinically accurate test results remotely to their computer EHR from our smart platform.

Machine vision technology reduces patient error.

Pregnancy - Monitor protein hypertension.

Urinary Tract Infections - identify infections

Pre-Diabetes - identified

# Olive Diagnostics

## OLIVE TAKE THE STICK OUT OF URINALYSIS FIRST HANDSFREE URINALYSIS DEVICE

Caring for Seniors is entering a phase unlike anything ever seen before in history. By 2050, 22% of the global population will be 60 years and over. This is almost double from 12% in 2015 and will only increase pressure on aging global health systems.

**The Olive KG**  
Olive's KG combines cutting edge Optics with IoT technology, AI, and big data analysis to deliver the world's FIRST truly passive, non-invasive urine diagnostic system allowing for continuous monitoring.  
- Clinically Validated  
- ISO 13485 Certified

### Analytes currently detected:

- Protein
- Red Blood Cells
- Nitrites
- pH level
- Specific Gravity
- Color
- Volume
- Frequency: time of day, duration and flow pressure

### Market Size Opportunity

- IoMT \$187 billion with a CAGR of 29.5%
- Remote Patient Monitoring \$16.6 billion, CAGR 20%
- Self-Monitoring 536.2 billion, CAGR 16%

### Opportunity Model

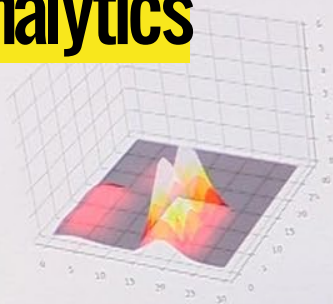

- End Users
- Low-cost device purchase & monthly subscription (SaaS)

### Distributor Opportunity

- Revenue-share
- Easy sale
- Reduce barriers to market entry
- Exclusivity

Olive Diagnostics helps deliver good health for EVERYONE. Always!

# Labrador Retrivers

The image shows a trade show booth for Labrador Retriever. On the left, a television on a black stand displays a website interface. In the center, a Labrador Retriever robot is positioned on a white shelving unit. To the right, a large blue banner features the company logo and a photograph of an elderly man with a cane. The robot in the foreground is a dark grey unit with a white top and a brown front panel. The background includes a white sign with the company name and a window with a corkboard.
