Structuring the N&S management research area

• Created a N&S management taxonomy
  – http://www.simpleweb.org/ifip/taxonomy.html

• Has been implemented within the JEMS system and used for manweek’09, NOMS’10, CNSM’11, NOMS’2012,

• Purpose:
  – For authors: fixed keywords to chose from
  – For reviewers:
    Fixed keywords to indicate area of expertise / interest
    No need to continuously enter expertise again
  – For organizers: match papers and reviewers
  – Improve Quality of Reviews

  - Within our community highest reputation
  - TNSM has been reviewed by Thomson for inclusion, but not (yet) accepted
      - not enough cited / not enough citations
      - reason: only recently in IEEE Xplore
  - TNSM is indexed by Scopus and many others

Statistics on Network, systems, and Services Management Community

• Thanks to Yixin Diao and the JEMS maintainers
• Querying JEMS for the past 5 years (2006-2010):
  – 24 workshops in MANWEEK
  – 40 conferences/workshops in IM/NOMS
• Authors
  – 710 overlap between IM/NOMS and MANWEEK authors
  – IM/NOMS: 915 authors appear more than once
  – Within IM/NOMS/MANWEEK: 1315 authors appear more than once
• TPC members
  – 760 people who have serviced at least once in IM/NOMS/MANWEEK
• Summary
  – Community is composed of about 700-900 regulars and 4000 one-time visitors
  – According to expert in social networking a community with more than 10% core members (in our case 15-20%) is believed to be very healthy
ComSoc Conference Portfolio Analysis

• All ComSoc conferences are in process to be evaluated
• KPI Scheme
  – Acceptance ratio – largely available/hotly disputed as Quality
  – Xplore Download Statistics as Popularity
  – Technical Scope, Uniqueness/Overlap
  – Financial (revenue/trend)
  – Attendance (absolute/trend)
• So far IM/NOMS is doing very well
